Junior Quality Analyst

- ✓ Professional with complete higher education in Systems Analysis and Development, with additional qualifications as a Software Test Analyst in career transition.
- ✓ He has more than 8 years of experience in problem solving and customer service through the analysis of corporate systems and acquired experience with SLA. For approximately two years, I worked remotely. I have an analytical, investigative and detail-oriented profile, and results-oriented.
- ✓ Furthermore, I have basic knowledge in functional test automation, manual testing, didactic experience in preparing test cases and their execution and bug reporting. I am available to start immediately and have experience in various sectors, from commercial to services.
- ✓ Furthermore, I have basic knowledge of frontend and backend languages, databases, git version control tools, api, agile methodology and understanding of requirements gathering.
- ✓ I am looking for opportunities that allow me to apply my skills and knowledge in a challenging and dynamic environment, contributing to the success of the team and the projects in which I will be involved. Full availability for sporadic trips to the company office for face-to-face meetings.

Latest Professional Experiences

Crowdtest - Software Tester

18/03/2024 - 09/04/2024
